### Research interests

My main research topic is natural Language Syntax, which includes :

- descriptive studies of various languages (mainly French),
- syntactic theories (mainly Tree Adjoining Grammars and Head-driven Phrase Structure grammar),
- linguistic resources for syntactic processing (that is a wide coverage French grammar FTAG and an annotated corpus : Paris 7 Treebank)

### Research projects

I am now mainly working on the following projects :

- a French HPSG grammar (in collaboration with D Godard and I. Sag),
- a large descriptive French grammar (Grande Grammaire du français), sponsored by Institut de Linguistique française (CNRS), directed by A. Delaveau and D. Godard. (2 volumes, 50 authors)

### Teaching experience
