

Gerd Faltings

Date of birth: 28 Jul 1954

Academic career

1978	PhD, Münster University
1978–79	Visitor, Harvard University
1979–82	Assistant, Münster University
1981	Habilitation, Münster University
1982–84	Professor, Wuppertal University
1985–94	Professor, Princeton University
1994–	Director, Max Planck Institute, Bonn

Honours

1984	Dannie Heinemann Preis
1986	Fields Medal
1988	Guggenheim Fellowship
1996	Leibniz-Preis
2008	Karl-Georg-Christian-von-Staudt-Preis
2009	Bundesverdienstkreuz I. Klasse
2010	Gumin-Preis

Invited Lectures

1986	ICM Plenary Address
1994	ICM invited talk

Research Projects and Activities

I do research on whatever I find interesting

Research profile

Diophantine equations, Arakelov theory, abelian varieties, moduli spaces of vectorbundles, p-adic Hodge theory

Editorships

Associate editor or board member: Compositio Mathematica, Journal of Algebraic Geometry

Former Research Area D I have found a crystalline version of nonabelian p-adic Hodge theory for ‘small’ representations. Motivic cohomology and Diophantine equations: Kim has introduced a new method into Diophantine approximation. The paper [Fal07] constructs a motivic logarithm for arbitrary curves. An open question is the construction of such an object in algebraic K-theory, as well as a good definition of torsors over it.

Former Research Area E Using the Hitchin fibration, the dimension of global sections for line-bundles of central charge one on moduli spaces of G-bundles has been computed in [Fal09]. In [Fal10] I determined the image of the Rapoport-Zink period map in the case of $GL(n)$, confirming conjectures of Hartl and Rapoport-Zink.

Research Area DE

Supervised theses

PhD theses currently: 1

Selected PhD students

Michael Larsen (1988), now Professor Indiana; Wieslawa Nizioł (1991), now Associate Professor

Utah; Shinichi Mochizuki (1992), now Professor Kyoto; Jarvis Tyler (1994), now Professor Brigham Young; Christian Liedtke (2004), now Postdoc Stanford; Majid Hadian (2010), now Postdoc Duisburg-Essen.
